ITF_TW_2_STUDENT.md 1/26/2022

STUDENT VERSION (TW-2)

Meeting Agenda

- ► Icebreaking
- **▶** Questions
- ► Interview Questions
- ► Coffee Break
- ► Logical Reasoning Questions
- ► Video of the week
- ► Retro meeting
- ► Case study / project

ITF_TW_2_STUDENT.md 1/26/2022

Teamwork Schedule

Ice-breaking 10m

• Personal Questions (Stay at home & Corona, Study Environment, Kids etc.)

- Any challenges (Classes, Coding, studying, etc.)
- Ask how they're studying, give personal advice.
- Remind that practice makes perfect.

Ask Questions 15m

1. What do we mean by Computational Thinking?

- A. Breaking a task into smaller tasks
- **B.** Understanding a complex problem and developing possible solutions
- **C.** Focusing on what is important, ignoring what is unnecessary
- **D.** Selecting a computer to use

2. Breaking a complex problem down into smaller problems and solving each one individually?

- A. Programming
- **B.** Decomposition
- C. Abstraction
- D. Algorithmic Thinking

3. Why do we need to think computationally?

- **A.** To help us to think like a computer
- B. To help us program
- C. To help us solve complex problems more easily
- **D.** None of these

4. What is an Algorithm?

- A. Some instructions
- **B.** Something a computer does to think

ITF_TW_2_STUDENT.md 1/26/2022

- C. A series of steps and instructions with given outputs to produce an input
- **D.** A series of steps and instructions with given inputs to produce an output

5.	What is	the result	of the	following	operation?

```
print(1 + 4*3)
```

- **A.** 15
- **B.** 13
- **C.** 12
- **D.** 10

6. Which python code gives the output "I love Python"?

- **A.** input("I love Python")
- **B.** output("I love Python")
- C. read("I love Python")
- **D.** print("I love Python")

7. Guess the output of this code:

```
print( (3**2)//2 )
```

- **A.** 0
- **B.** 2
- **C**. 4
- **D.** 3

8. What symbol(s) do you use to assess equality between two elements?

- **A.** &&
- **B.** ==
- **C.** =
- **D**. ||

9. What value would be returned by this check for equality?

```
5!=6
```

ITF_TW_2_STUDENT.md

1	1/2	6	12	n	2	1

- A. Yes
- **B.** False
- C. True
- **D.** None

10. Select all options that print?

hello-how-are-you

- A. print('hello', '-how', 'are', '-you')
- **B.** print('hello', 'how', 'are-', 'you' + '-' * 4)
- **C.** print('hello-' + 'how-are-you')
- **D.** print('hello' + '-' + 'how' + '-' + 'are' + 'you')

Interview Questions

15m

- 1. What does computational thinking stand for and why it is important?
- 2. What are the key features of Python?
- 3. How memory is managed in Python?
- 4. What are the four stages of computational thinking?

Coffee Break

10m

Logical Reasoning Questions

15m

1. Five children are sitting in a row. S is sitting next to P but not T. K is sitting next to R who is sitting o
the extreme left and T is not sitting next to K. Who are sitting adjacent to S?

- **A.** K & P
- **B.** R & P
- C. Only P
- **D.** P and T
 - S is sitting next to P. So the order S,P or P,S is followed. K is sitting next to R. So, the order R, K is followed because R is on the extreme left. T is not next to P or K. So the arrangement will be R, K,P,S,T. Clearly, P and T are sitting adjacent to S.
- 2. In a family, there are husband-wife, two sons and two daughters. All the ladies were invited to a dinner. Both sons went out to play. Husband did not return from office. Who was at home?
- A. Only wife was at home
- B. Nobody was at home
- C. Only sons were at home
- D. All ladies were at home

Video of the Week 10m

• Computational Thinking: What Is It? How Is It Used?

Retro Meeting on a personal and team level

10m

Ask the questions below:

- What went well?
- What could be improved?
- What will we commit to do better in the next week?

Closing 5m

- Next week's plan
- QA Session
